print + web communications

Honeycomb Creative Solutions

www.honeycombcreative.com

At Honeycomb Creative, we believe nothing represents a company as simply or with such impact as its logo. Professionally designed, it communicates and reinforces all of a business' qualities and ideals – organized, reputable, dependable, reliable, innovative, respectful – across all print and electronic materials. It becomes much more than an image and text; it becomes a promotional opportunity exercised on every business card, piece of stationery, vehicle graphic, tradeshow display, print ad and website page.

We are specialists at communicating the professional nature of a business, sometimes without saying a word.

Our integrated print and web solutions will echo your company's qualities through every logo, corporate identity package, marketing collateral and website we create for you.

- website
- print ads
- vehicle graphics

"Through a series of interviews, Honeycomb Creative's team came up with these wonderful ideas that began with the phrase 'What if we did this...?' And through this process, they not only created a corporate website but also developed and polished my company's image."

"The feedback we're receiving is really positive. People like that the look isn't overly complicated, yet it incorporates some special design elements to be sensitive to our business. Honeycomb understood what we were looking for and responded to our needs. They brought lots of ideas and options to the table for us to consider. This project was definitely a joint effort."

Malcolm Cairns,
Parallel Group of Companies
